Heat Transfer Fins

Clear Cover

Up to 55
gpd and
250 psi

Digital
Timing
Circuits

  
Color Options

MicroTron pumps combine reliability and microprocessor timing for superior speed, metering accuracy, and long life.

Standard features include: Menu Flexibility; LCD Display; Power LED; Stroke LED; Clear Cover; 36,000:1 Turndown

Optional Control Features:

- Pulse Timer
- 4-20mA Input
- Biocide Timer
- FloTracker
- Percent Timer
- Multiply
- Divide
- External Stop

SERIES A

Feed Timers Built-in

Standard features include: Digital speed adjustment for greater turndown capability; Power LED, Stroke LED; Clear Cover

Optional Control Features:

- External Pace
- Limit Timer
- Dual Speed
- External Stop

SERIES B

Popular Dual Adjustment

Standard features include: Simple manual stroke length adjustment with digitally fixed speeds:

Optional Control Features:

- External Pace
- External Stop
- Clear Cover

SERIES C

Single Economy

Standard features include: Metering pumps with a controller built in for an economical unit; Menu Flexibility, LCD Display, Stroke Length Adjustment, Power LED; Stroke LED, Digital Speed Adjustment; Clear Cover

Optional Control Features:

- Conductivity
- Feed Timers
- pH
- ORP

SERIES R

Controller/Pump Combo

Advantage
Controls

Liquid End

Precision-guided double ball checks achieve superior seating. The built-in priming / degassing valve ensures the pump stays primed.

Head and Seat Options

GFP, Kynar, PVC and Stainless Head
Teflon, Viton or Hypalon Seats

Accessories

- Single Wall Tanks
- Double Wall Tanks
- Stands and Mixers
- Injection Fittings
- Mounting Options

Flow Tracker

The FloTracker measures product passing through the discharge tubing with precise elliptical gears, transmitting a digital pulse.

Optionally equipped MegaTron controllers and Series A or R pumps can process this pulse output for inventory control, loss of prime, and feed verification.
